Description:

Soccer Tactics WORLD combines the strategy of soccer with the heart of the game. Eleven players per team on a traditional full-length field. This game includes dribbling, passing and capturing the ball; and intense battles for ball control.

But watch out - yellow and red cards can be handed out! There are short and long passes, and offensive and defensive strategies. Free Kicks, Goal Kicks, Corner Kicks and Penalty Kicks. And don't be caught Off-Side!

Play a full 90 minute game (or set your own time). This game plays like the real thing. **Soccer Tactics WORLD** is Pure Soccer Emotion!

Ages: 7+ **Players:** 2 (for 4 players you can have 2 players on each team)

Included: 2 teams (11 pawns each: red and blue), 2 dice, 1 football disc, 1 timer, 5 red cards, 10 yellow cards, 2 spinners (1 is a spare), 1 board, 2 score dials, short rules, 1 instruction booklet, 1 trophy, 1 shooting die (see page 13)

Object of the game:

The object of the game is to win the game by out-scoring your opponent in a timed 90 minute game (2 forty-five minute halves) or whatever time limit that you choose.

1. Set Up and Kick-Off

A. Set Up (see Figure 01)

Each team has eleven pawns (players): Two strikers and four midfielders (pawns with numbers); four defenders (without numbers) and one Goal Keeper (1). The ten players who are not the Goal Keeper are also called field players.

Row 1 will have the Goal Keeper on one of the two squares in the Goal Area.

Row 4 will have the 4 defenders in columns B, D, E and G.

Row 6 will have the 4 midfielders (any numbers) in columns A, C, F and H.

Row 8 will have the two strikers (any numbers) lined up anywhere in the row. However the team kicking the ball (the O-Team) must have one pawn with the ball in the circle (either square). The other team's strikers must respect the one square Free Kick zone (see 'Free Kick', rule 10).

The O-Team (Offense) sets up their pawns first.

Place the yellow and red cards anywhere beside the board.
Each team has one die.

B. Kick-Off

Before the timer is started both teams roll the dice to see who gets to Kick-Off. The team that has the higher roll gets to kick off the second half. The team with the lower roll gets to kick off the first half. This team then starts the game as the O-Team (Offense).

To kick off the game, the O-Team places the ball and one of its strikers in one of the squares in the center circle. The pawn can be placed directly on the ball (this shows the ball possession). The opponent's strikers have to respect the one square zone around the pawn with the ball (see Figure 12).

When everything is set up, you start the timer. The O-Team rolls the die to kick (play) the ball. **(Note: On the Kick-Off you do not move a pawn first.)**

The ball must move forward and across the center line. The O-Team then rolls the die again and can attempt to capture the ball (see 'Capturing the ball', rule 4A).

The pawn that did the Kick-Off is not allowed to touch the ball again until another pawn has touched it. (Just like real Soccer!)

2. How the pawns move (see Figure 02)

To move a pawn you roll the die. The pawn moves according to the full amount of the roll.

The pawn can move straight or diagonally in any direction. The directions can be combined, **but you can only change directions once in the same move.**

A pawn cannot go back to a square that it has crossed during that move.

Pawns can pass through squares that are occupied with a pawn from the same team but cannot pass through squares with pawns of the opponent's team (because the opponent's pawn blocks the way).

The pawn can only go as far as the same square as the opponent; not past it (on that move). On a subsequent move you can move past it.

Defenders have to stay in their own half. They are not allowed to cross the center midfield line. Strikers and midfielders can go anywhere on the board. The Goal Keeper can move only one square in any direction (see 'The Goal Keeper', rule 6).

Each square may have only one pawn from each team on it maximum. Two pawns from one team are not allowed to be on the same square.

The maximum amount of pawns (from the same team) that are allowed to be directly beside each other in a row is four. The maximum amount of pawns (from the same team) that are allowed to be directly beside each other in a column is three. This is to avoid too much blocking.

In the Penalty Area the maximum amount of field players allowed from either team is four (besides the Goal Keeper).

Only one pawn from each team is allowed in the Goal Area. Usually one is the Keeper.

Each move has a time limit of 60 seconds from when the die is rolled (see 'Time Limits', rule 11).

Figure 02
How the pawns move
 Roll of the die: 4

Figure 03
How the ball moves
 Roll of the die: 4

3. How the ball moves (see Figure 03)

The team that has sole possession of the ball is on **Offense**. **To play the ball you roll the die.** The ball moves according to the full amount of the roll. The ball can move straight or diagonally in any direction. The directions can be combined (the ball may move straight and diagonally in one move) **but you can only change directions once in the same move.**

The ball cannot go back to a row or column that it has passed during that move.

The ball can pass over squares which have pawns of either team on them.

Each move has a time limit of 60 seconds from when the die is rolled (see 'Time Limits', rule 11)

4. The Normal Play of the Game

O-Team: the team on **Offense**

D-Team: the team on **Defense**

The Team that has sole possession of the ball is the O-Team. (Whenever the D-Team gains sole possession of the ball, it then becomes the O-Team.)

The O-Team moves first.

OFFENSIVE SET

- **The first thing** that the O-Team does is move one of its pawns (not the pawn with the ball). To move a pawn you roll the die. The pawn moves according to the amount of the roll.
- **The second thing** that the O-Team does is play (move) the ball:

Playing the ball

To move the ball you roll the die. The ball moves according to the amount of the roll. The O-Team has the following options to play (move) the ball. It can:

- A. play the ball to a free square and attempt to capture the ball (see rule 4A, below)
- B. play the ball to a square with only a teammate on it (see 'Direct Pass' rule 4B)
- C. dribble with the ball (see 'Dribbling', rule 4C)
- D. play the ball to a square with two pawns on it (see 'Battling', rule 4D)

For the D-Team response to each of these offensive plays, look under the respective rules below.

A. Capturing the ball (see Figure 04)

If the O-Team plays the ball to a free square (a square with no pawns on it), then the O-Team rolls the die again immediately and can attempt to **capture the ball** (by moving any pawn, including the pawn that played it, to the same square).

These two plays are always together. If you play the ball to a free square, you always roll the die again immediately, to attempt to capture the ball.

If the O-Team is able to move one of its pawns to the square with the ball, it has captured the ball.

After that the D-Team rolls the die, and can attempt to get to the same square to battle for the ball (see 'Battling'- rule 4D). Move a D-Team pawn the amount of the roll. If the D-Team can reach the square with the ball and the O-Team's pawn, then there is a **battle** for the ball.

If the D-Team cannot reach this square, then it becomes the turn of the O-Team again.

Figure 04

Capturing the ball

Pawn A plays the ball to a free square.
Pawn B captures the ball.

Figure 05

Direct Pass

(However the D-Team still moves a pawn the amount of the roll.) The O-Team has kept possession and begins a new **OFFENSIVE SET**.

If the O-Team is not able to reach the ball on its first attempt, it will still move a pawn the amount of the roll. If the D-Team can then reach the ball on its first attempt, it has captured the ball. The D-Team then becomes the O-Team and begins a new **OFFENSIVE SET**.

Both teams always get the same amount of attempts to get to the ball.

B. Direct Pass (see Figure 05)

If the O-Team plays the ball to a square that has only a teammate on it, this is a Direct Pass (there is no D-Team move on this play). The O-Team must then play the ball again immediately. If there is another Direct Pass on this extra play, the O-Team does not go again (except if the second direct pass is received inside the penalty area or on a long distance shot square - see rule 5B - in which case the O-Team shoots for a goal right away.) After the extra play the D-Team then rolls the die and tries to move a pawn to the square with the ball.

C. Dribbling

If the O-Team rolls a "1" to play the ball, there is an option (besides playing only the ball) to move the ball and pawn together. The pawn which has possession of the ball may move one square in any direction **with the ball**.

The D-Team then rolls the die and tries to move a pawn to the square with the ball. If the D-Team gets there a **battle** takes place. If the D-Team cannot get there then the O-Team keeps possession of the ball and begins a new **OFFENSIVE SET**.

D. "Battling" for the ball (see Figure 06)

A battle immediately takes place when:

- The D-Team moves a pawn to the square that has the O-Team pawn with the ball.
- The O-Team plays the ball to a square with two pawns on it (one from each team).
- The O-Team dribbles the ball to a square with a D-Team pawn on it (see rule 4C).

To battle, both teams roll the dice at the same time. The team with the highest roll wins the battle, gets sole possession of the ball, and begins a new **OFFENSIVE SET**.

(The team that wins the battle places its pawn on the ball to show the ball possession.) If there is a tie, roll the dice again.

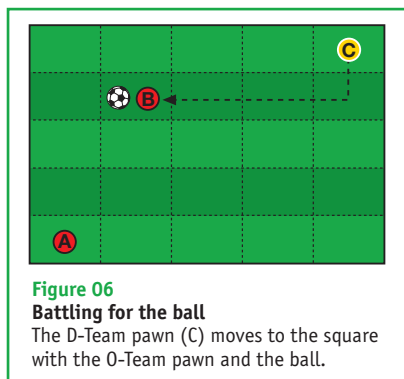

Figure 06

Battling for the ball

The D-Team pawn (C) moves to the square with the O-Team pawn and the ball.

Any pawn on your team can battle for the ball.

The defender (halma) pawns count as **+1** on top of the die roll (battling).

The Goal Keeper counts as **+2** on top of the die roll (battling).

Strikers and midfielders count the exact amount of the die roll.

5. Scoring (Rules for the Penalty Area)

Scoring is only allowed in the *Penalty Area.

(*Exception: see 'Long Distance Shot', rule 5B.)

To attempt to score, the O-Team normally has to defeat the D-Team (in a battle).

It then shoots for a goal, by spinning the spinner in the center circle. If the spinner lands on one of the four Soccer ball areas it is a goal!

If the spinner lands on one of the two red flags it is a Corner Kick for the O-Team (see 'Corner Kick', rule 8).

If the spinner lands on one of the two ① areas it is a Goal Kick (see 'Goal Kick', rule 6C).

If a goal is scored the teams are re-set for the Kick Off. The team that was scored against does the Kick Off.

When you spin the spinner it must go around at least two complete turns to count. Give it a good spin! If the spinner lands directly on the line it is a goal.

A. Scoring in the Penalty Area

1. CAPTURING THE BALL IN THE PENALTY AREA

If the O-Team captures the ball in the Penalty Area it has the chance to score. The D-Team will then attempt to get to the same square to battle for the ball. (By rolling the die and moving a pawn.)

If the D-Team can get to the square then a battle takes place (see 'Battling', rule 4D).

If the D-Team wins the battle it gains possession of the ball and begins a new **OFFENSIVE SET**.

If the O-Team wins the battle it will shoot for a goal! If there is a tie, roll the dice again.

If the D-Team cannot get to the square with the O-Team pawn and the ball, then the O-Team shoots right away.

2. DIRECT PASS INTO THE PENALTY AREA

If the O-Team passes the ball directly to a square with only a teammate on it (in the Penalty Area) it shoots for a goal right away. Even on a second Direct Pass. No D-Team move.

If the O-Team passes the ball directly to a square with two pawns on it (in the Penalty Area) a **battle** takes place immediately. If the O-Team wins it shoots. If the D-Team wins it gets possession of the ball and begins a new **OFFENSIVE SET**.

B. Long-Distance Shot (see Figure 07)

There are two squares marked with a star just outside of the Penalty Area.

If an O-Team pawn receives a **Direct Pass** on one of these squares it is a scoring chance. Even on a second Direct Pass.

The O-Team shoots immediately! The Long-Distance Shot squares count as **normal** for all other plays.

Figure 07
Long-Distance Shot
 Squares C4 and F4

Figure 08
Goal Kick
 All of the opposition pawns must leave the Penalty Area for the Goal Kick.

6. The Goal Keeper

The Goal Keeper starts the game on one of the two squares in the Goal Area.

Whenever the Keeper plays (kicks) the ball, he uses two dice.

A. How the Goal Keeper moves

When it is your turn to move a pawn (on defense) you have to decide if you want to move the Keeper or a field player. If you decide to move the Keeper, you do not roll the die but move the Keeper. He can move one square in any direction.

If the die is rolled, you must move a field player (the Keeper cannot be moved).

B. Battling the Goal Keeper

If the Keeper comes to a square with an O-Team pawn and the ball to battle, the normal "Battling" rules apply (**rule 4D**). Anytime the O-Team defeats the Keeper in a battle it shoots for a goal right away. If the Keeper wins he begins a new **OFFENSIVE SET**.

C. Goal Kick (see Figure 08)

When the O-Team shoots for a goal and the spinner lands on one of the two ① areas it is a Goal Kick. All of the opposition pawns must leave the Penalty Area for the Goal Kick. (Place them in the row, and columns just outside of the Penalty Area.)

The Keeper gets possession of the ball on either square in the Goal Area and begins a new **OFFENSIVE SET**.

Use two dice for the goal kick.

The ball must leave the Penalty Area to be in play.

The Keeper can not touch the ball again (after playing it) until another pawn has touched it. (Just like in real Soccer!)

7. Off-Side (see Figure 09)

If an O-Team pawn is between the last D-Team **field player** and the goal line, that pawn is in an Off-Side position. If this pawn receives a Direct Pass or captures the ball in this area, it is Off-Side.

This will result in a Free Kick for the D-Team from the square where the ball was played to (see 'Free Kick', rule 10).

However the ball can come into this area and be played by other O-Team pawns that are on-side and the play is **not** Off-Side.

If an O-Team pawn is in an Off-Side position **in the Goal Area** and there is any scoring opportunity for the O-Team (in the Penalty Area or on a Long-Distance-Shot square), the play is **immediately** Off-Side. This is because the pawn in the Goal Area is interfering with the Keeper. The D-Team gets a Free Kick from the square where the ball was played to.

Figure 09
Off-Side

Pawn B is in an Off-Side position.

Figure 10
Corner Kick

8. Corner Kick (see Figure 10)

When the O-Team shoots for a goal and the spinner lands on a red flag area, it is a Corner Kick for the O-Team. If the Keeper is out of the Goal Area it has to be placed back in the Goal Area. The Corner Kick will be taken from the same side of the field from where the scoring attempt was made.

The ball is placed in the corner arc, on the corner square, where the kick will come from. The pawn that attempted to score will kick the Corner Kick. Place this pawn just off of the field close to the corner flag.

For the Corner Kick each team can now move 3 pawns (or make 3 moves - because the same pawn can be moved more than once).

You do not roll the die for setting up the pawns for the Corner Kick.

You can move any pawns from anywhere on the board, to anywhere on the board. (Of course the defenders and the Keeper must stay in their own half.)

So beginning with the D-Team, each team now alternately places 1 pawn at a time.

No pawns from the D-Team can be within 1 square all around the ball (Free Kick Zone). Only 4 pawns maximum from the D-Team are allowed in the Penalty Area

For the Penalty Kick all pawns except the Goal Keeper have to leave the Penalty Area. The pawns can be placed on any square in rows 3 or 4 **outside** of the Penalty Area, beginning with the team that committed the foul and alternating teams.

The pawn that was fouled is placed on one of the two squares in the penalty arc. No D-Team pawns are allowed on these two squares. Place the ball on the Penalty Kick spot.

The Goal Keeper is placed on the center of the goal line in the middle of the goal.

When everything is set up the O-Team shoots for the goal by spinning the spinner. After the Penalty Kick the Goal Keeper is placed back on one of the two squares in the Goal Area.

C. Minor Rule Violations

Every other violation of the rules during the game is a minor foul, and will result in a Free Kick given to the offended team. No red or yellow cards (or Penalty Kicks) are awarded for these minor fouls. An example of an minor foul would be the moving of a defender pawn into the offensive half. When a violation is noticed the play is corrected immediately, and the offended team takes a Free Kick from any one of the four squares in the center spin circle.

However if the O-Team is the offended team, they can decline the Free Kick and continue with the offensive chance.

10. Free Kick (see Figure 12)

After a foul (see 'Fouls', rule 9) the offended team gets a Free Kick. The offended team gets the ball on the square where the foul was committed. The pawn that was fouled does the Free Kick. All pawns of the opponent's team must respect the one square Free Kick Zone around the ball. This zone must also be respected on Corner Kicks and the Kick-Off.

If there are any pawns from the team that committed the foul in this zone they must move out.

They have to be placed in the rows and columns directly outside of this zone (any squares). The O-Team then begins a new **OFFENSIVE-SET**.

The pawn that does the Free Kick is not allowed to touch the ball again until it has been touched by another pawn (from either team). Real Soccer rule!

[When you do a Free Kick after an Off-Side, use any pawn from the offended team close to the ball.]

Figure 12

Free Kick

Pawn A does the Free Kick.

All opponent's pawns must respect the one square Free Kick zone around the ball.

11. Time Limits and the End of the Game

A. Time Limits

Each move has a time limit of 60 seconds (ball or pawn) from when the die is rolled. Most moves are completed in a lot less than 60 seconds. This time limit is in the rules to make sure that nobody is delaying the game on purpose, especially towards the end of the game. The purpose of the time limit is to have a general flow to the game and not for players to check the timer constantly.

However: If the rule is violated see rule 9C.

If pawns have to be reset - for Corner Kick, Penalty Kick, Free Kick, Goal Kick or the new Kick Off after a goal is scored - it should be completed within 60 seconds.

B. End of the Game (and Injury Time)

When the timer goes off the game (or half) is over. However, when the timer goes off in the middle of an offensive chance, it has to be completed. This means that if the O-Team has at least played the ball into the *Penalty Area (before the timer goes off) it must be allowed to complete this offensive chance. It will result in either a goal or not. **Corner Kicks must be allowed to be completed as well.**

*Or has played a Direct Pass to a Long-Distance Square

C. Over Time (Extra Time)

If there is a tie at the end of regulation play, then two Over Time periods of 15 minutes will be played (or a time limit that is agreed upon). You must play the two full periods. If the teams are still tied after the two Over Time periods, there will be a Penalty Shoot Out. Each team will take five Penalty Kicks, alternating between each team (see 'Penalty Kick', rule 9B). Roll the dice to see who will go first. Whoever scores the most goals wins.

If it is still tied after the shoot-out, the teams will shoot one Penalty Kick each until the game is decided. The teams must have the same amount of chances.

12. Variation

A. Advanced Rule:

To have a more competitive, low-scoring game, the defender (halma) pawns will count as **+2** on the die roll in battles.

B. Shooting Die:

For players who prefer to shoot for the goal with a die instead of the spinner in the center circle we have included a special die in the game. Roll the die for the shot instead of spinning the spinner.
